6 trade secrets to choosing a cake

1. Make sure you love the taste.
2. Get creative with the design; bring your ideas and inspirations!
3. Consider venue and weather (no one wants a melted cake).
4. Pay for delivery and set up (trust us, it's worth it).
5. Don't wait until last minute to order your cake; we recommend 6-9 months.
6. It's your day; don't let too many people provide input.

Let's talk cake. 6-9 months in advance is ideal. Need it in a pinch? Let us see what we can do!

Get ready to fall in love

with your wedding flowers. Whether you lean towards the traditional or are inspired by the unconventional (the sky is the limit)!

Posey

small and round, tied with ribbon

Cascade

waterfall of blooms in a holder or hand-tied

Round

dense bunch of flowers tightly tied with ribbon

Hand-Tied

dense bunch of flowers loosely tied together

Pageant

similar to cascade but more compact

Kissing Ball

ball of flowers tied with ribbon (great for flower girls)

trade secret

Preserve your bouquet

Fill the bottom of an airtight container with a layer of silica gel. Place flowers on top making sure they are not touching. Completely cover the flowers with another layer of silica gel surrounding each petal. Put the lid on and leave for 2 weeks. Gently uncover the flowers and display in a frame or shadow box with memorabilia from your wedding day.

Ranunculus winter • spring

To stretch your budget, choose flower varieties that are in season and consider using big blooms rather than tiny flowers.
